EDUCATION

Villanova University, Villanova PA
Bachelor of Science: Computer Science

Chaminade High School, Mineola NY

SKILLS & CERTIFICATIONS

Technical Skills

- **Backend:** Python, Rust, Node.js, and Bash; **Frameworks:** FastAPI, Dask, Pydantic, and Prefect; **Data Engineering:** PostgreSQL, Databricks, Kafka, Clickhouse, Iceberg, Polaris, Trino, and Redis; **CI/CD:** ArgoCD, Git, and GitHub Actions; **Infrastructure as Code:** Terraform, OpenTofu, Crossplane, Docker, and Kubernetes; **CDN:** Akamai and Fastly; **Cloud:** AWS and Azure; **Monitoring:** Datadog, Prometheus, and Grafana; **MLOps:** CUDA, Nvidia GPU Operator, Qdrant, LangGraph, and vLLM;

Certifications

- AWS Associate Developer Certification

EMPLOYMENT

Exos Financial New York, NY **January 2026-Present**

Assistant Vice President, Cloud Infrastructure Engineer

- Directed infrastructure design, deployment, and automation of NVIDIA GPU-backed Kubernetes clusters on Azure to support distributed Python machine-learning workloads (Dask) powering real-time cryptocurrency trading strategies.
- Drove cloud modernization and migration initiatives by implementing OpenTofu/Terraform, GitHub Actions CI/CD, Kubernetes-native tooling (Envoy, Argo CD, Grafana), and Apache Iceberg/Polaris, improving deployment reliability and platform efficiency.
- Partnered with quantitative researchers, traders, and engineers to productionize Bitcoin and digital asset models, ensuring performance, resiliency, and regulatory compliance.
- Developed a Gemma 4 inference engine from HuggingFace on AKS using vLLM, FastAPI, and LangGraph for use across all firm business units.

Fox Corporation New York, NY **February 2022-December 2025**

Senior Devops Engineer

- Deployed and hosted the FoxOne Web, Smart TV, and Xbox Next.js applications on Kubernetes using Docker & ECR for containerization, Helm and Kustomize for configuration management, and a GitOps approach with ArgoCD
- Developed a Kubernetes-hosted ETL application with Rust-based data producers streaming to Apache Kafka via Strimzi with data consumption and processing handled in Databricks.
- Monitored the daily performance and infrastructure metrics of Fox applications through DataDog and Grafana by developing synthetic tests in Javascript, parsing through logs, and constructing Dashboards for each application's metrics through terraform
- Developed a Python-FastAPI for a Multi-CDN purge application which is hosted on a terraform built EKS Cluster powered by an ArgoCD Gitops approach for CDN cache clearing
- Constructed a video streaming service's ETL application in python utilizing AWS Lambda, API Gateway, AWS Glue, and Kinesis Firehose for real-time data processing, while handling storage through S3 and Elasticache

NTT DATA Services New York, NY **July 2021- February 2022**

Devops Engineer

- Designed and deployed cloud infrastructure and technology for clients using AWS and Azure, leveraging Terraform to ensure scalability and reliability.
- Implemented and optimized CI/CD pipelines utilizing Azure Pipelines to enhance efficiency and reliability in code deployment processes.
- Automated client needs and processes by creating Linux bash scripts and Python scripts, resulting in improved efficiency, and reduced manual effort.

Unisys Blue Bell, PA **June 2020-Sept 2020**

Software Engineering Intern

- Developed automated Jenkins and other CI/CD pipelines to streamline the testing process for Unisys's network security software.
- Debugged and wrote PowerShell scripts for seamless integration and optimization of a legacy security application for the security team.
- Implemented unit and integration tests for security scripts through pair programming with fellow interns, ensuring reliable code quality.

ACTIVITIES

Villanova University

Pi Kappa Phi President

- Led the Pi Kappa Phi fraternity as President, overseeing all aspects of chapter operations, from organizing and executing events to managing the executive board and fostering a strong sense of brotherhood and community among members.

Villanova Google Developer Student Club

- Attended weekly lectures hosted by the Villanova Google Developer Student Club, featuring keynote speakers who covered a wide range of topics related to computer science, enhancing my knowledge, and understanding of current trends and best practices in the field.
